DETAILED ACTION

Claim Objections

1. Claims 13-30 are objected to because of the following informalities:

Appropriate correction is required.

Claim 12 is missing. Claims 13-30 should be renumbered.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 22-26 and 29 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. "code" must be stored in computer readable medium to be statutory.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 2, 5-7, 10-11, 13- are rejected under 35 U.S.C. 102(e) as being anticipated by Hamiti et al PG-PUB 2004/0047437 A1.

Re Claims 1, 13, 18, 22, 27, 28, 29 fig. 1 teaches a UE caller (first end-user) establishing a SIP session (a signaling plane... SIP) to the UE Callee (a second end-

user); further teaches that the communication system supports RTCP to monitor QoS and gives information about the end-users of the session [0088]; fig. 9 teaches the header that include the QoS information [0080] to be shared by the network.

Re Claims 2, 5, 6, 7, refer to Claim 1, wherein fig. 9 includes plurality of parameters (signaling parameter & media transmission quality parameter).

Re Claims 10, 11, See UE device.

Re Claims 14, 23, refer to Claim 13, wherein the network includes a Server.

Re Claims 15, 16, 19, 20, 24, 25, , refer to Claim 13, wherein SIP message is a set-up message.

Re Claims 17, 21, 26 refer to Claim 13, wherein the UE includes a display to display and GUI function for messages (QoS parameter).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 3, 4, 8, 9, 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hamiti et al PG-PUB 2004/0047437 A1 in view of 2005/0094623.

Re Claims 3, 4, 30, Hamiti et al fails to explicitly teach, "a time taken between one invite...to first proxy...second proxy. However, '623 teaches that QoS parameter includes measuring the time for SIP signaling in the participating devices [0071]. One skilled in the art would have been motivated by '623 to measure the a time taken

between the proxy for reliability. Therefore, it would have been obvious to one ordinary skilled to combine the references.

Re Claims 8, 9, refer to Claim 1, wherein the QoS parameter includes packet loss.
